Welcome Message

Assalamualaikum Warahmatullahi Wabarakatuh

Dear honorable guests,
Sustainable Development Goals (SDGs) as an agreement of sustainable development objectives agreed by all countries at the 2015 UN sessions. Each country including Indonesia has an obligation to implement this joint development plan by applying universal, integration and inclusive principles by ensuring that no one missed or “No-one Left Behind” Indonesia has Nawa Cita or 9 priority agenda which should synergize with SDGs and can be used as health program application in Indonesia to also achieve SDGs.

On behalf of the organizing committee and the Nursing Society of Indonesia, I am glad to invite you to join ICHM 2018 (International Conference on Health Care and Management) in Bandung, Indonesia on July 16-17, 2018.

The conference is expected to reveal some solutions for evidence-based health care and scientific facts to be discussed by various viewpoints from diverse speakers from around the world with the title “Evidence to inform action on supporting and implementation of SDGs. Through the International Conference is expected to improve health services, especially in the field of nursing in Indonesia to improve the human development index.

We hope all participant could benefit from the exciting program and will surpass your expectation and that will be an inspiring event.

Warm regards,

Dhika Dharmansyah
Conference chair

Assalamu'alaykum Wr.Wrb
Good morning and best wishes for all of us.

Ladies and gentlemen, in such a great and happy day, let's praise and thank to Allah Swt who has given us grace and mercy to all of us to gather in this International Conference on Health Care Management event today.

First of all, we would like to gratitude and appreciate highly to national Cheng Kung University Hospital has given the opportunity and confidence to our institution STIKep PPNI Jabar for the second time in collaboration to organize International Conference on Health Care Management with theme: "Evidence to inform action on supporting and implementation of SDGs". This event is one of follow up The memorandum of Understanding between NCKUH with STIKep PPNI Jabar.

STIKep PPNI Jabar is as a nursing education institution carry out the mandate to create professional nurse, we must implement all TRIDHARMA University activities in academic atmosphere that aims to broaden and improve nursing and existence of nurse profession capacity in nation developing continually.

As we know the university academic quality is determined by its researches and graduates result quality. The research work results may be either a right against managing intellectual wealth equity as well as scientific work which is able to be publicized through scientific journals and scientific gathering forums of the same scientist background both in national and international level.

Nevertheless, the publishing of journal researches is published by its university. Nowadays, it is irregular because there are both financial and scientific manuscript availability drawbacks. Scientific regular manuscripts are very limited because manuscript contributor is only from its university as well.

The high education Research and technology ministry data in 2017, it stated that there were an increase of research work publishing done by practitioners, academicians and researchers of Indonesian. The amount of Indonesian research publishing on international journal certifiable indexed Scopus tended to increase. The high education Research and technology ministry data on December 1st 2017 noted that Indonesia scientific research publishing reached 14.100 journals. Meanwhile, on October 1st 2017 there were as many as 12.098 journals.

However, internally nurse profession scientific research journals are still less of publishing. It is alleged to the low of quantity and quality publishing about nursing. One of the drawbacks is rarely the interaction between nursing scientists and experts in scientific conferences. Some efforts are carried out by STIKep PPNI to encourage and to accelerate sharing knowledge amongst the nursing experts. Accordance to the goals, National Cheng Kung University Hospital Taiwan and STIKep PPNI have made MoU and held as this International conferences organizer. Hopefully, it is able to bridge all stakeholders, practitioners, and academicians in supporting the quality of the human resources especially, nurses and health workers as well.

The honourable ladies and gentlemen,
Nowadays, in the global era, the transformation runs rapidly and consequently it makes the knowledge based society. Information and communication technology development are very important in on its role in manifesting society development based on the knowledge. The higher education of society will be higher of health service quality demands specially nurse.

Accordance to the effort, this International conference aims to,

1. Facilitate the knowledge sharing between health experts and nurses to encourage the goal of health human resource quality.
2. Produce health scientific and nursing articles deserve to be published on international scopus indexed journal.
3. Make communication networking amongst Universities, research institution, nurse practitioners, and other stakeholders.

I truly believe that all participants through the 2 days in international conference, our goals above are able to be manifested well.

Finally, I would like to thank to all of participants diligently and with spirit of attending this international conference on health care management.

Wish the conference is able to be knowledge sharing event and delightful and successful as well, the conference will be enlightened and interchange will do great help for us after attending this conference, especially STIKep PPNI Jabar and generally for all profession nurses to provide health services to communities, aamiin ya robbal alamin.

Wassalamu'alaykum Wr.wb.

Kindest regards,

The Dean of STIKep PPNI Jabar

Excellencies, Distinguished Delegates, Ladies and Gentlemen,
Selamat Siang,

I'm ChyunYu Yang, the superintendent of National Cheng Kung University Hospital in Tainan, Taiwan.

On behalf of our hospital, it is my pleasure and privilege to welcome all of you to participate in the international conference on health care and management 2018.

To our eminent speakers and delegates who have come from UK, Netherland, Korea, Japan, Thailand, Singapore, Taiwan, and Indonesia, I bid you a very warm welcome to Bandung. We are indeed honoured to have you here with us. We have about 1.000 participants from different place in Indonesia and countries gathered here today, making our conference a truly meaningful one.

This is our second time collaborate with STIKEP PPNI Jawa Barat to hold an international conference. Last year, we have very successful conference with the theme focus on infection control and disaster management. And this year, our conference theme is "evidence to inform action on supporting and implementation of SDGs".

The Sustainable Development Goals (SDGs) known as the global goals, are a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity. Goal 3 addresses all major health priorities and calls for improving reproductive, maternal and child health; ending communicable diseases; reducing non-communicable diseases and other health hazards; and ensuring universal access to safe, effective, quality and affordable medicines and vaccines as well as health coverage.

However, the world seems still far from ending maternal mortality, with more than 303,000 deaths in pregnancy or childbirth occurring annually. NCDs are also a growing problem, causing 40 million deaths in 2015.

But, All in all, we can take comfort in the fact that SGDs indicators are moving in the right direction .Yet we still have plenty of work to do.

I wish in the next two day and a half, we have the opportunity - and indeed the responsibility - to prepare and add knowledge related the current situation and progress reflection of SDGs.

In closing, I encourage delegates to participate actively in the interesting discussions over the next two days. I wish everyone a successful and fruitful conference.

Thank you.

ABSTRACT

Background : Professional nursing practice model (PNPM) is a system (structure, processes and professional values) which assists professional nurse, organizes providing nursing care. It is a structure framing and a process of providing nursing care in the ward in order to provide professional nursing care. There are 4 main components in the PNPM. Those are nursing personnel, method of providing nursing care, nursing process and nursing documentation. **Objective**: to find out the implementation of PNPM in nursing care. **Method**: The method used in this study is descriptive method, which is describing of how PNPM is implemented in the field. The data are collected by interview (as prior study), observation and filling questioner. **Result**: nursing care is provided using the functional method with modified team. The functional method with modification means the method of asking a nurse to find a group of clients through cooperation and collaboration. The model of professional nursing practice in the Garuda wards does not run so well, it can be seen from the duties of the headroom, the primary nurse and the nurse on duty did not perform their duties and responsibilities as states in the organizational structure. the Implementation of meeting morning, pre-post conference and weighing shift have not been conducted optimally. Some of these problems, generally, are because of the lack of human resources, especially the nurses. So the process of implementing the PNPM does not run maximally. **Conclusion**: The implementation of PNPM in the Garuda wards has not been implemented entirely. It is because the nurse round has to wait for the health practitioner who often have other business. The lack of nurse number that are incomparable with the number of Beds also make the implementation of the PNPM in the Garuda wards has not been maximum.

Keywords: PNPM, nursing care

INTRODUCTION

Nursing as a profession is defined as one of professional service which integrated and inseparable with the efforts of health services as a whole. In addition, the nursing service determines whether a hospital has poor or good both in quality and image. Therefore, the quality of nursing service needs to be maintained and increased, thus the result will be optimal.

Nursing services at hospitals is to meet human basic needs, in the form of nursing care, conducted through a process of assessment to the main causes of the human basic needs which not fulfilled, decide nursing diagnosis, action planning, execution, and evaluation. The whole processes are called the nursing process. (Nursalam, 2007)

Nurse is one of the professions playing an important role in the implementation of hospital service quality. To make a nurse a professional personnel, it is necessary to do continuous coaching so it makes nurses as medical personnel getting paid attention. Recognized and respected their professionalism that can be achieved through the implication of nursing management system. Implementation of nursing management system requires a strong managerial capability which can be gained through various ways, one of them is improving ones skills.

To notice this, good management processes needs to be applied in providing nursing care so that the nursing care meets the professional standards. Resources for nursing care services are used commonly, efficiently, effectively, safely for patients and nurses. Satisfactory for patients and nurses as well as social, economic, cultural, religious, ethical and social values are considered and respected. One of the efforts is to provide nursing services through the development of a scientific nursing practice model, that is Professional Practice Model Nursing (PNPM). The Professional Nursing Practice Model (PNPM) is a system (structure, process and professional values) that facilitates professional nurses, regulates providing nursing care, including the environment in which the care takes place (Sitorus, 2006) This model is framing the structure and the process of providing nursing care at the level of the wards care so that the nurse enable to provide professional nursing care. There are 4 main components in the model of professional nursing practice, namely nursing care, methods of nursing care, nursing process and nursing documentation.

Nursing standards are the guidelines of the nursing process from assessment, deciding nursing diagnosis, intervention planning, implementation and evaluation (Potter & Perry, 2005) Standard nursing plan is a reference for nurses in providing nursing care. The plans should be made as effectively and efficient as possible so that they do not make the nurse work beyond her working time. By doing less writing, nurses will have more time to provide nursing care.

The implementation of PNPM has been strived at the General Hospital of Dr. M Ashari of Pematang regency, yet the implementation is far from optimal Garuda is a part or a unit of general hospital Dr. M. Ashari Pematang regency which is special care wards for children. To provide nursing care to all patients who require medical attention and nursing care services. Therefore, it is necessary to have a clarity about authority and responsibility which the implementation refers to the organizational structure organized.

The result of the study conducted with deep interview to headroom of Garuda said that Garuda wards have not got any input to implement PNPM. Hence, the writer intents to conduct a further research about how to implement PNPM on Garuda wards.

CONCLUSION

Giving nursing care to Garuda wards is with functional method with modified team. The implementation of PNPM at Garuda wards is not optimal because the process of PNPM is not conducted overall. Nursing round is a process from PNPM that personnel of Garuda wards do not fully conducted since the health practitioners have other business. Moreover, there is no Standard Operating Procedure (SOP) about how the nursing round should be done.

There are lack of personnel that is the number of nursing personnel incomparable to the number of beds.

The absent of SOP, lack of budget, and lack of medication tools also effect the implementation of PNPM in the Garuda wards. Remembering that the accreditation was held by December 2016.
